

NOVEMBER 2019

WSSS ANNUAL LECTURER DINNER

Sunday, November 3rd

Inside this issue:

<i>WSSS Annual Lecturer Dinner</i>	1
<i>Residents as Teachers, Leaders, & Researchers</i>	2-6
<i>History of the Detroit Receiving Hospital Burn Center</i>	7-17
<i>The Burn Survivor Picnic</i>	18-19
<i>67th Annual Detroit Trauma Symposium</i>	20-25
<i>Greetings from the Outfield</i>	26
<i>WSU Conferences</i>	27
<i>WSSS Dues</i>	28
<i>WSSS Members</i>	29-30

2020 WSSS OFFICERS

President:

Jeffrey Johnson (WSUGS 1984)

Vice-President:

Scott Davidson (WSU/GS 1990/96)

Secretary-Treasurer:

Pamela Johnson (WSU/GS 1984/89)

Members-at-Large:

Larry Narkiewicz (WSU/GS 2004/09)

Bruce McIntosh (WSU/GS 1989/94)

Jay Dujon (WSUGS 2011)

Resident Member:

Anastasia Stevens-Chase (WSUGS 2020)

Immediately prior to the annual Detroit Trauma Symposium there is the annual WSSS Lecture. The 2018 lecturer was Dr. Lena Napolitano, Professor of Surgery at the University of Michigan School of Medicine, Acute Care Surgery (Trauma, Burns, Critical Care, Emergency Surgery) and Associate Chair for the Department of Surgery.

Dr. Roxie Albrecht

This year's WSSS Lecture will be Dr. Roxie Albrecht, who is a Professor of Surgery at the University of Oklahoma Health Science Center and is the Division Chief of General Surgery, Trauma, and Surgical Critical Care. Dr. Albrecht received her early education at the University of Iowa prior to doing her internship and residency at Michigan State University (MSU), primarily at the Butterworth Hospital. Following a year of surgical critical care, she returned to MSU, where she was actively involved in trauma, acute care surgery, and critical care. Subsequently, she became Director of the Trauma/SICU Service at the University of Mexico before moving to the University Of Oklahoma Health Science Center, where she is the Director of the Trauma/Critical Care Service. She is well published in trauma/critical care, serves on many national committees, and has held many officer positions within the Society of Critical Care Medicine. She has held officer positions in many of our national societies and is currently the President of the Western Trauma Association. Dr. Albrecht will be giving the Wayne State Surgical Society Lectureship on Wednesday, November 6, 2019, at 8 a.m.

RESIDENTS AS TEACHERS, LEADERS, AND RESEARCHERS

One of the many mandates of the Residency Review Committee (RRC) relates to the need for surgical residents to become proficient in or at least understand, the principles of surgical teaching, surgical leadership, and surgical research. This year’s program was held on Wednesday, October 16, at the Margherio Family Conference Center next to Scott Hall. Dr. David Edelman (WSU/GS 2002/09), our Residency Program Director, organized and moderated this half-day program.

Dr. David Edelman begins the program

Dr. Edelman presided over the morning session and identified the objectives for the total program and outlined the importance of this type of activity as part of residency training.

The first portion of the program dealt with resident reports from the American College of Surgeons resident sponsored meetings. The first report was provided by Dr. Nina Delavari (WSUGS 2021) and summarized the importance of identifying quality, particularly as it relates to cost and outcome, and the importance that the ACS has for proper quality education.

Dr. Nina Delavari

The next two reports dealt with the ACS Advocacy Meeting and were provided by Dr. Jessica Pochedly (WSUGS 2020) and Dr. Rohan Policherla (WSUGS 2020). Their presentations dealt with the many advocacy positions that are taken by the ACS and were discussed by the residents from all parts of the country, including Dr. Pochedly and Dr. Policherla who were representing WSU.

Dr. Rohan Policherla

Dr. Jessica Pochedly

The next presentation was provided by Dr. Anastasia Stevens-Chase (WSUGS 2020) and dealt with many aspects of surgical resident leadership and education. She pointed out the importance of identifying educational goals and providing means to achieve these goals.

Dr. Anastasia Stevens-Chase

RESIDENTS AS TEACHERS, LEADERS, AND RESEARCHERS, cont..

The next session was the 9th Annual Scott Woods Lecture, entitled “Education, Patient Care, and Wellness,” presented by Dr. Parth Amin. Dr. Scott Warner Woods finished his medical school training and surgical training at WSU in 1959 and became the first busy general surgeon in Ypsilanti, Michigan. Dr. Woods was always a strong supporter of the department of surgery and always volunteered to come in from Ypsilanti and take night call at the old Detroit General Hospital on the fourth Tuesday of every month. If a secretary had made a clerical error and put someone else’s name on for that day, he would simply tell that individual that he was going to be sleeping in the on-call room on the fifth floor of the old hospital right above the operating room. Dr. Woods not only provided support by his attendance at all department functions but provided philanthropic support for the department.

Dr. Parth Amin

Dr. Parth Amin completed his surgical residency training at WSU in 2009. During his residency training, he also worked in the WSU Department of Immunology doing research on mucosal responses to various challenges. Following residency training, he did fellowships in trauma/critical care at the University of Tennessee in Memphis, vascular surgery at the University of Iowa in Iowa City, and cardiothoracic surgery at Loyola Medical Center in Maywood, Illinois. He spent one year in the Division of Trauma, Emergency General Surgery, and Critical Care at the University of Iowa before accepting the job at Bronson Methodist Hospital in Kalamazoo, Michigan, where he is actively involved in the department of cardiothoracic surgery and the department of vascular surgery.

Dr. Amin’s multiple training programs have allowed him to be an expert in many areas. He has served as an ad-hoc reviewer for many journals, particularly in the area of critical care. He has published many peer review articles and has written many invited chapters in his young career and has provided dozens of invited lectures both locally and national.

Dr. Amin presented a very succinct report identifying residency problems and their solutions, dealing with complicated patients, restricted work hours, professionalism,

Continue page 4

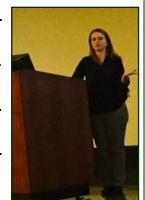

RESIDENTS AS TEACHERS, LEADERS, AND RESEARCHERS, cont..

studying for examinations, and subsequent career goals. His presentation was highly appreciated by all, particularly the residents.

The second half of the program dealt with the techniques for obtaining appropriate IRB approval for all investigative studies, the importance of medical education research, the effect of sleep deprivation on our daily functions, and the causes of burnout.

Ms. Heather Park-May, the IRB Training Coordinator for WSUSOM, presented “Tips and Tricks for a Smooth IRB Review,” where she described a very detailed summary of the purposes for IRBs and the different classifications of research that do or do not require permits from patients in order to collect their private data. She emphasized the importance of protecting patient identification and showed how information may be safely collected without endangering any leak of confidential patient information. She went through the IRB review process and provided answers to how a resident or young attending can get approval from the IRB office for their research projects.

Ms. Heather
Park-May

Dr. Jason Booza, the Assistant Dean for Continuous Quality Improvement and Compliance at WSUSOM, presented a comprehensive review on “The Basics of Medical Education Research,” which dealt with all aspects of research including the societal need, patient protection, and mentoring of young people newly involved in research projects. He emphasized the importance of senior-level support of young investigators without overwhelming them and without taking as their own any ideas coming from the mentee. His presentation was very comprehensive and much appreciated.

Dr. Jason
Booza

This presentation was followed by “Sleep Deprivation—Does It Exist in Surgery?” presented by Dr. M. Safwan Badr, the Chairman of the Department of Internal Medicine at the WSUSOM. Dr. Badr presented a very exciting and somewhat humorous treatise, showing how sleep deprivation affects all of us and how the negative effects of sleep deprivation vary according to the duration and degree of sleep loss. He identified 7 hours per night as being the optimal time in order

Dr. M. Safwan
Badr

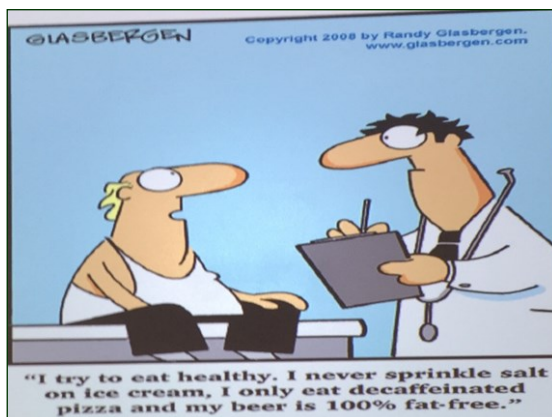

RESIDENTS AS TEACHERS, LEADERS, AND RESEARCHERS, cont..

for surgical residents and attending surgeons to function at their optimal level. He presented many scientific studies supporting that conclusion.

The next presentation, “Burnout and the Value of Physician Wellness,” was presented by Dr. Jason Wilkinson from the Department of Psychiatry & Behavioral Neurosciences at WSUSOM. He presented his paper in an ad-lib fashion without relying on any notes but did, very effectively, use slides to highlight certain points related to burnout. He distributed a questionnaire, which had over 20 questions related to a physician’s work activities. These questions dealt with compromises the physician has to make in order to provide care for a patient and also the rewards, or lack thereof, that a physician has by going out of his/her way to provide the most optimal care. This excellent survey form was distributed to everybody so that each can plot their own score and see how it fits in to national norms that identify whether someone is a candidate for “burnout.” His presentation was very comprehensive and also quite humorous.

Dr. Jason
Wilkinson

“I try to eat healthy, I never sprinkle salt on ice-cream, I only eat decaffeinated pizza, and my beer is 100% fat-free.”
 “I try to eat healthy, I never sprinkle salt on ice-cream, I only eat decaffeinated pizza, and my beer is 100% fat-free.”

Following a question-and-answer session, Dr. Edelman wrapped up the seminar and requested feedback in order to help him determine how he will organize the seminar for 2020.

Dr. Parth Amin (center) providing an update on his last 10 years to Dr. Anna Ledgerwood (WSUGS 1972) and Dr. David Edelman (WSU/GS 2002/09)

Dr. David Edelman introducing Dr. M. Safwan Badr

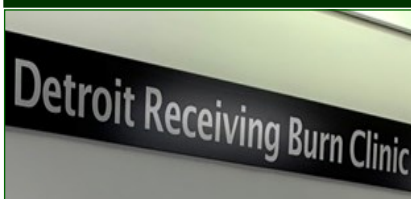

Dr. Chris Steffes (WSUGS 1993), the Assistant Dean of Clinical Medical Education, pondered what they're going to do different next year.

Dr. David Bowman (WSUGS 1978), our former Walt Professor, ponders the presentations while Dr. Donald Weaver (WSUGS 1978) and Dr. Larry Diebel (WSU/GS 1980/86) discuss patients

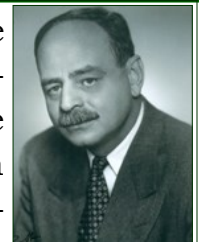

Detroit Receiving Hospital Burn Center Reverified!

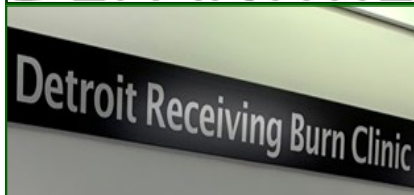

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER

The Burn Center at Detroit Receiving Hospital traces its origins to the old Detroit General Hospital (DGH) (previously called Detroit Receiving Hospital). During the 1950s, the Surgical Service was divided into three separate divisions. Burn patients were treated on all three divisions, whereas any burn greater than 25% total body surface area was treated on Division III. Dr. Charlie Johnston was the Chairman of the Department, and Dr. Nicholas (Nick) Steiner Gimbel provided the leadership in the care of all burn patients. Dr. Gimbel was born in New York City in 1918 and received his medical degree from the University of Pennsylvania in 1944. He did his internship at Bellevue Hospital and then spent two years in the U.S. Army from 1945-1947. He did his residency at the University of Pennsylvania and spent a year there as an instructor in surgery. He came to WSU as an assistant professor of surgery in 1952 and became associate professor of surgery in 1955. Dr. Gimbel was looked upon by his family as the “black sheep” because he was the only person within his generation that did not get involved, as a career, with the Gimbel Department Stores. Dr. Nicholas Gimbel was an interesting character. He was very intense about his work but also had a tremendous sense of humor. Once, when Drs. Lucas and Ledgerwood were seated in a New York restaurant, an elderly waiter, appropriately attired, asked if we wanted something to drink before ordering our meals. The waiter was Dr. Gimbel, who was having dinner with his residents and borrowed the waiter’s coat in order to pose as our waiter. He had an interest in many things, especially nutrition and burn wounds. He published many articles on burn care including “New and Old Methods of Managing Burn Wounds” in the Michigan State Medical Society Journal in 1956, “The Study of Epithelialization in Blistered Burns” in the Archives of Surgery in 1957, and “Preoperative and Postoperative Consideration in Extensively Burned Patients” in the 1959 issue of the

Dr. Charles G. Johnston

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

Surgical Clinics of North America. He devoted about half his time to burn patients and the other half to training general surgery residents on the wards and in the operating room. At that time, Dr. Gimbel provided very close and excellent supervision to the residents and interns providing burn care. He also treated burned children since the old DRH had a large pediatric service. Dr. Gimbel served as interim chairman after the death of Dr. Charlie Johnston and prior to the arrival of the new chairperson, Dr. Alan Thal.

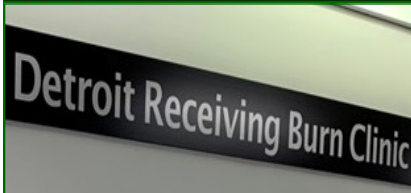

Dr. Alan P. Thal

Following the arrival of Dr. Thal, Dr. Gimbel left the full-time faculty and served a short tour as Chief of Surgery at Metropolitan Hospital in Detroit prior to returning to his surgical origins in Pennsylvania, where he continued to be involved with residents and burn care.

The Editor recalls, vividly, how many of his classmates volunteered to participate in some of Dr. Gimbel's clinical research. Each of the volunteer medical students would receive a superficial burn to ten locations on the abdominal wall just below the umbilicus. The Editor's best recollection is that the volunteers received \$200 for these initial burns, which were then treated by ten different burn regiments. Whenever the superficial burn would be associated with blistering, there was a supplemental payment for each blistered site. During these years, the tuition for one year of medical school was \$501, so that if one of the volunteers had all ten of the burn sites blister, his/her tuition for that year would be totally covered. Dr. Gimbel continued his interest in wound healing and burns and published several articles, including an article in Surgery on "A Technique for Studying Epithelialization in Man with Evidence for Its Acceleration by Certain Fatty Acids" in 1964 and "The Pattern of Superficial Blood Vessels in Healing Skin Donor Sites" in 1965. A final article on "The Influence of Surface Temperature Upon the Epithelialization Rate of Split-Thickness Skin Donor Sites" was published in the Archives of Surgery in 1966.

Dr. Alexander J. Walt and Dr. Kamil Imamoglu

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

Dr. Walt, who became Chairman of the Department of Surgery at WSU in 1965, was a visionary and saw the need to care for the burn patients in a specialized unit to fulfill the needs of the burned citizens in Detroit. The DGH was admitting 150-200 burn patients per year. Shortly after assuming the chairmanship, Dr. Walt arranged for all of the major burns (>30%) to go to Division III and recruited Dr. Kamil Imamoglu to assume the leadership of burn care. Dr. Imamoglu was born and raised in Turkey, where he received his medical degree at Istanbul University followed by his general surgery training at the Istanbul University Hospitals. He completed his general surgery training at Numune Hospital in Turkey. When he came to the United States, he worked with Dr. Owen Wangenstein at the University of Minnesota, where he attained his PhD and redid his general surgery residency to become board certified in the United States. He came to WSU in 1965 as an assistant professor and there began his treatment of burn patients. Dr. Imamoglu was a master general surgeon, and all of the residents, including the Editor, were thrilled to have him guide them through various complicated intraabdominal operations. He also treated burned children who came to DGH at that time, and there was a separate room set up for the care of burned children. Dr. Imamoglu applied to the Michigan Crippled Children Commission for privileges, which is noted in a letter in his file to Dr. Gerald Rice, who was head of this commission. During these years, Dr. James Lloyd was the leader in the care of burned children being treated at the Children's Hospital of Michigan. When Dr. Tom Grifka (WSUGS 1966) completed his surgical residency, Dr. Walt assigned him to work with Dr. Imamoglu; Dr. Paul Kindling (WSUGS 1966) also assisted with burn care.

In 1963, Dr. Carl Moyer, at the Washington University in St. Louis, published his first work on the use of 0.5% silver nitrate solution for treatment of burn wounds. By serendipity, the surgeons at the old DGH were the first to treat a Michiganian patient with silver nitrate. During the period of time when Dr. William Matthews (WSUGS 1964) was the chief resident on Division II, the rotating intern under Dr. Matthews had received his medical school training in St. Louis and had worked on Dr. Carl Moyer's Burn Unit. In January 1964, a woman who had a 25% total body surface area burn, and should have been treated on Division III, was

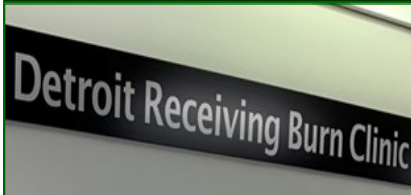

Dr. Carl Moyer

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

actually treated on Division II under the supervision of Dr. Matthews. The patient was treated with silver nitrate according to Dr. Moyer's protocol. Later, in 1965, when Dr. Jim Lloyd bragged about being the first person in Michigan to provide silver nitrate therapy for burned children at the Children's Hospital of Michigan, the Editor reminded him that the first burn patient in the State of Michigan treated with silver nitrate was treated at the DGH. This became a common topical antibiotic therapy used during this time to treat burn wounds and decrease wound infections. The antimicrobial properties were broad with activity against Gram-positive and Gram-negative bacteria, plus yeast. Also, there were nurses who were trained specifically for wound care and the use of silver nitrate solution at DGH. Dr. Imamoglu emulated Dr. Carl Moyer's treatment of burns and received copies of Dr. Moyer's article entitled "Burn, Shock, and Extravascular Sodium Deficiency: Treatment with Ringer's Solution with Lactate and Treatment of Large Burns with 0.5% Silver Nitrate Solution," which had been published in the Archives of Surgery in 1965. Dr. Imamoglu also published a paper on the development of cancer in old burn scars in the Journal of Progress in Clinical Cancer in 1965. With the encouragement of Dr. Walt, Dr. Imamoglu began to standardize the treatment of burn patients at DRH.

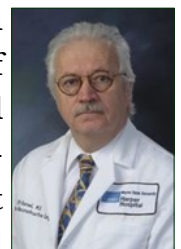

Following Dr. Imamoglu, Dr. Thomas Grifka became director of the burn unit at DGH. Dr. Grifka obtained his medical degree at the University of Michigan and then did his general surgery residency under Dr. Alan Thal and Dr. Alexander Walt at WSU Department of Surgery. Dr. Grifka joined the faculty as instructor of surgery in 1966 then became an assistant professor of surgery in 1967. During that time, he took over as director of the burn unit. Dr. Grifka had many qualities that made him an excellent choice for caring for burn patients. In a letter from Dr. Walt, it is stated that he found Dr. Grifka to have a great attention to detail and to be extremely dedicated to his burn patients, spending several hours per day on their care. He and the resident team cared for 150-200 burn patients per year on his own. Dr. Grifka's attention to detail benefited the progress of the burn unit under his leadership. During his tenure as burn director, he and Dr. Walt were able to get a unit constructed at Detroit General Hospital, specifically for the care of burn patients. It consisted of six beds as well as a hydrotherapy room with hydrotherapy tubs

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

for twice-daily treatment of the burn wounds along with a separate wound care room for applying topicals and dressings once tubbing was completed. At that time, there was no separate operating room in the unit. Dr. Grifka also continued treating burned children at Detroit General Hospital and, like Dr. Imamoglu, he applied to the Crippled Children's Board for care of burned children, including skin grafting, excision, and treatment of burn wounds. To help Dr. Grifka progress academically, Dr. Walt made contact with Dr. John Boswick and was able to get Dr. Grifka elected as a member of the American Burn Association (ABA). In 1972, Dr. Grifka presented a paper at the ABA entitled "Silver Nitrate Cream in the Treatment of Burn Wounds." Dr. Walt also hoped to have Dr. Boswick visit the burn unit at DGH for recommendations on further improvements. During Dr. Grifka's time as burn director, he also developed a multidisciplinary team for the care of burn patients with representatives from psychiatry, rehabilitation, nursing, medicine, and social work, who were enlisted to help in the care of burn patients; this was consistent with the modern treatment of burn patients at that time. The care of burns was one of the first specialties to use a multidisciplinary approach. During that time, Dr. Grifka managed the unit with the help of a general surgery intern. For the larger burns, he had one of the general surgery divisions help with the care of the critically ill patients. By the end of Dr. Grifka's period as director, Detroit General Hospital had developed a true burn unit with its own hydrotherapy and wound care room, and had already developed protocols for care of the burn patients along with developing a multidisciplinary team for the evaluation of each patient.

Dr. Grifka left Wayne State University and Detroit General Hospital in 1972. Dr. Eti Gursel (WSUGS/PS 1975/77) then took over the directorship of the burn unit at DGH. Dr. Gursel is originally from Turkey and did his general surgery training at Wayne State University, along with his plastic surgery training, then joined the department of surgery at Wayne State University. At that time, the burn unit had eight beds along with a room with a Hubbard tank and a room for wound care. For additional training in burns, Dr. Gursel spent time at the Brooke Army Hospital with Dr. Basil Pruitt for two months, where he learned early

Dr. Eti Gursel

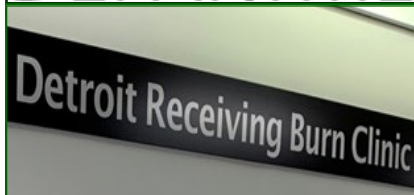

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

tangential excision and grafting, which had been shown by others to reduce mortality and reduce infectious complications. Dr. Gursel also brought back with him the technique of wound biopsies for diagnosis of burn wound infections. During Dr. Gursel's tenure as director of the burn unit at DGH, construction of a new burn unit began at the new Detroit Receiving Hospital, which was done with the help of Dr. Walt and Dr. Imamoglu. The new burn unit at Detroit Receiving Hospital had two separate units, one for critically ill burn patients and the other for patients who were no longer critically ill but had mainly wound issues. The new burn unit had its own hydrotherapy room with Hubbard tanks and an area for wound care along with a separate operating room where the temperature could be controlled. Also, during this time, burn care for children was shifted to Children's Hospital of Michigan under the directorship of Dr. James Lloyd.

The opening of the new burn unit at Detroit Receiving Hospital coincided with the arrival of Dr. Martin Robson, who would become the new director of the burn unit at Detroit Receiving Hospital. He did his medical training at Johns Hopkins Hospital in Baltimore. His internship was completed at the University of Chicago, and his residency was completed at Baltimore City Hospitals, Maryland, followed by the Brooke Army Medical Center in Texas. He then did a fellowship in plastic and reconstructive surgery in New Haven, Connecticut, 1971-1973. He stayed on at Yale as staff before moving to Chicago where he developed both his clinical and academic career. He became the Burn Director and Chair of the section of Plastics and Reconstructive Surgery at Chicago University, where he remained from 1974 to 1983. He also developed a very successful lab with the help of John Hegggers, Ph.D. The lab focused on several areas including host defenses as it relates to wounds; antimicrobial topical therapy for wounds, including burns; and the study of burn wounds and wounds from frostbite. Dr. Walt recruited Dr. Robson to become the new Chief of Plastic and Reconstructive Surgery at Wayne State University and Burn Director, with the hope of developing an academic program in plastic and reconstructive surgery along with advancing the productivity of the burn unit at Detroit

Dr. Martin Robson and Dr. John Hegggers, Ph.D

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

Receiving Hospital. During Dr. Robson's tenure at Wayne State University, he tried to unite the burn units at the Detroit Receiving Hospital and the Children's Hospital of Michigan under one director, but this was never fulfilled. By the time Dr. Robson joined our department, he was a significant figure in the ABA and held the position of Vice-President of the ABA. During Dr. Robson's tenure, the Plastic and Reconstructive Surgery Division and the Burn Unit became very successful. He recruited several staff members including Dr. David J. Smith Jr., Dr. Linda Phillips, Dr. Walter Sullivan, and other faculty for the Plastic and Reconstructive Surgery Division. He also recruited Dr. Paul Zidel, who was a graduate of the Plastic Surgery Residency Program. In addition, Dr. Robson brought his entire lab with him, including John Heggars Ph.D., to continue his research, which included an emphasis in microbiology. The Burn Unit at Detroit Receiving Hospital probably had its greatest notoriety while under Dr. Robson's directorship. Dr. Robson left the department in 1988 to take over the Division of Plastic and Reconstructive Surgery at the University of Texas.

Following Dr. Robson's departure, Dr. Paul Zidel (WSUGS/PS 1986/88) became the Director of the Burn Unit at Detroit Receiving Hospital as well as becoming Chief of Plastic and Reconstructive Surgery at Wayne State University. He then did a hand fellowship at New York University before returning to join our staff in 1987. During his time as director of the burn unit, Dr. Linda Phillips helped him manage the care of burn patients. Dr. Zidel was director of the burn unit until 1991 after which Dr. Michelle Hardaway (WSUGS 1989) became director of the burn unit. She received her burn training from Detroit Receiving Hospital, where she had spent one year as a fellow before going to New York City to Nassau County Medical Center for her plastic surgery training. She was eventually made Chief of Plastic and Reconstructive Surgery at Detroit Receiving Hospital. She left the department as full-time faculty in June 1992 but remained on as a clinical assistant professor, at which time she was still active in the department. After Dr. Hardaway's departure, there was a short period when Dr. Robert Wilson (WSUGS/TS 1963/

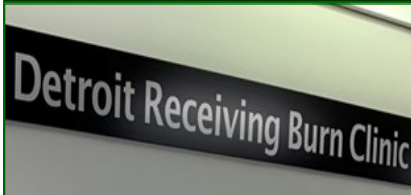

Dr. Paul Zidel

Dr. Michelle Hardaway

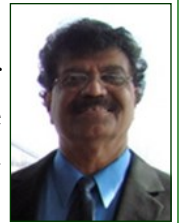

Dr. Robert Wilson

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

65) and Dr. Chenicheri Balakrishnan oversaw the care of burn patients. Dr. Balakrishnan had completed his burn surgery training as a fellow for one year at Detroit Receiving Hospital and stayed on to join our staff and helped in the care of the burn patients. He eventually became Chief of Plastics and Reconstructive Surgery at Detroit Receiving Hospital.

Dr. Chenicheri
Balakrishnan

Dr. Jai Prasad was then recruited by Dr. David Fromm, Chairman of the Department of Surgery, Wayne State University, to become the new director of the burn unit at Detroit Receiving Hospital. Dr. Prasad had originally been director of the burn unit at the University of Michigan Medical Center for several years and had received his burn training under Dr. Irving Feller. He had been in private practice at Oakwood Hospital before being recruited to WSU to take over the burn unit. Once recruited, Dr. Prasad began making several changes to the burn unit. He moved the Burn Clinic from the sixth floor of the University Health Center to the third floor (3S) of Detroit Receiving Hospital, just one floor below the burn unit. He saw patients twice weekly in the burn clinic, which was also staffed with a burn nurse, a social worker, and a physical/occupational therapist for evaluation of all returning burn outpatients. Dr. Prasad also developed a skin bank to prepare allograft cadaver skin for burn patients, and he developed his own research lab and began actively publishing data as he had done at the University of Michigan. He also recruited Ms. Dawn Lang, who had worked in outreach at the University of Michigan, developing an extensive relationship with the Dearborn and Detroit firefighters. Through those relationships, two monoplace hyperbaric chambers were able to be purchased and were utilized for both the management of wounds as well as for treatment of carbon monoxide poisoning from different etiologies including fires. Dr. Prasad also developed a program for frostbite victims.

Dr. Jai Prasad

Dr. David Fromm

Dr. Michael White (WSU/GS 1990/97) then took over the directorship from Dr. Prasad in January 2002. Dr. White's training in general surgery was done at WSU, and he spent two years learning the care of burn patients from Dr. Prasad along with learning the

Continue page 15

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

administrative side of managing a burn unit. Dr. White also spent time with Dr. Robert Sheridan at Shriners' Hospital in Boston and with Dr. David Heimbach at the Harborview Burn Unit before taking over as director of the burn unit after Dr. Prasad's retirement. During Dr. White's tenure, the long-sought-after goal of becoming a verified burn unit was realized in September 2007. Under the leadership of Dr. White, the burn center has maintained its verification from the American College of Surgeons and was most recently reverified this autumn. The site surveyors from the American College of Surgeons described many strengths with the burn program. These included 1) Dr. Michael White's dedication and commitment to the program; 2) Dr. White's leadership in burn management; 3) the addition of the laser

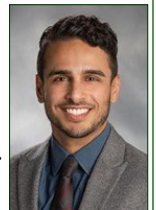

Dr. Michael T. White, Director
DRH Burn Center

Dr. Jim Tyburski

line with Dr. Faisal Al-Mufarrej; 4) the enhanced occupational therapy in the burn clinic; 5) improvement in the fluid resuscitation protocol; 6) support from other team members in the general surgery department including Dr. Jim Tyburski (WSUGS 1992) and Dr. Al Baylor (WSUGS 2005); 7) enhanced rerouting of small burns from other emergency departments to the burn clinic instead of to the DRH emergency department; 8) enhanced collaboration with the Children's Hospital of Michigan (CHM) Burn Center; and 9) increased volume of patients being treated in the DRH Burn Center and Burn Clinic. The number of patients seen yearly in the burn clinic has increased to 2,561 compared to 1,876 when the burn center was verified three years ago.

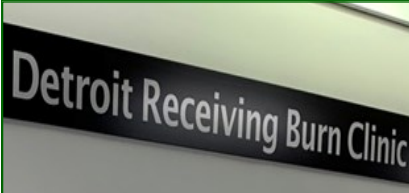

Dr. Faisal
Al-Mufarrej

Dr. Al Baylor

Dr. White has also improved the Burn Center Outreach program. They hold an annual picnic each year in conjunction with the CHM. This picnic is supported by many community partners and allows for burn survivors to reunite with the burn team that cared for them. Likewise, Dr. White has partnered with the University of Michigan and the Phoenix Society to host a burn survivor workshop, which offers burn survivors support in their ongoing recovery. Dr. White and his teammates provide multiple talks regarding burn scar management, physical therapy, navigating the Social Security system, and open sessions for survivors to share their struggles and successes along their road to recovery.

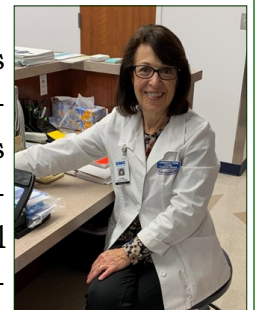

HISTORY OF THE DETROIT RECEIVING HOSPITAL BURN CENTER, cont...

These outreach activities include the provision of water temperature cards for diabetics to test the water before stepping into the bathtub. They have reached over 2,800 people with their activities in the health fairs, EMS education, and presentations at senior citizen apartment buildings and centers to provide education on burn and fire prevention. The DRH Burn Center has also worked with the CHM to provide smoke detectors to seniors at St. Pats Senior Center in order that they will have working smoke detectors in their homes. Of note, the burn unit has always been a source of education for the residents of Wayne State University as well as for residents from other surgery departments at local outlying hospitals. The Burn Service certainly provides excellent educational exposure in regards to critical care, fluid resuscitation, wound management, and aspects of reconstruction, so that it is a significant resource as it relates to residency education.

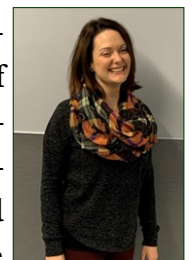

Dr. Michael White at work in the Burn Clinic

Residents have rotated on the Detroit Receiving Hospital Burn Service from the Providence, Beaumont, and Henry Ford Hospitals. Although the discussion of the history of the burn unit mainly revolves around the various staff members who were its directors, one cannot forget the dedication of the nurses, physical/occupational therapists, nutritionists, social workers, case managers, and PM&R physicians who have all contributed to the progress and care of the burn patients throughout the burn unit's history. Dr. White knows that Dr. Walt would be proud to see the current advances that have been made in the DRH Burn Center as a continuing resource to Detroit and Southeast Michigan.

Ms. Fredericka Hudak Director of Customer Service with Barton-Carey Medical Products

Ms. Rebecca VanStanton
Burn Program Coordinator

Dr. White thanks the assistance of Dr. Eti Gursel, Dr. Jai Prasad, Ms. Gloria Farris, Ms. Valerie Klima, Ms. Beth Bondy, and Ms. Mary Wright for their help in gathering the data described in this update on the DRH Burn Center.

DRH Burn Center Tip Card for Burn Assessment

THE BIRTH OF THE DRH BURN SURVIVOR PICNIC

A few years ago, the staff of the Burn Intensive Care Unit at Detroit Receiving Hospital noticed a common theme among our significantly injured patients. They would often come back to the unit to visit the staff and be excited to show off how well they were doing. The staff, in turn, have always been excited to see these former patients and were happy to see how well they are doing in their journey to long-term recovery after such a significant injury. The majority of these patients end up with significant life-altering injuries, which often resulted in disfiguring scars. These patients had often spoke on how they seclude themselves because of how difficult it is to adapt to the new life struggles they face and/or the lack of support they had outside of the immediate support system they may have. The staff and burn professionals are quite aware of these new challenges and wanted to do something to change that. They wanted to bring these patients together and celebrate what they had overcome. Inspired by what the NICUs does for an annual reunion, the staff at the DRH Burn ICU decided to make this change. With lots of ideas from staff and our survivors, as well as with assistance from the Burn Director, Dr. Michael White, the first Burn Survivors Picnic was launched in 2017. With an initial attendance of three patients, it has grown and progressed over the years. In 2018, we partnered with the burn staff at Children's Hospital of Michigan (CHM) and have started working collaboratively together in creating a Burn Survivor Picnic Committee. With this new group collaboration, they have been joined by additional community

2017 Burn Picnic
Supported by the Detroit Fire Department

partners who are equally as excited about the picnic. Together, DRH and CHM have hosted both the 2018 and 2019 Burn Survivor Picnic. This past September, the picnic was an extremely successful celebration of the over 20 patients registered who attended with their families. This has truly made a difference in the lifetime recovery of the DRH Burn Center patients. This picnic now allows us to provide resources, support, and encouragement that lasts beyond the care that was provided by the burn team upon their initial injury.

67th Annual Detroit Trauma Symposium

The Detroit Trauma Symposium is designed to address the continuum of care of the injured person. Presenters and attendees will represent physicians, nurses and allied health providers who work together to maintain the interdisciplinary cooperation, which is one hallmark of a coordinated system of trauma care. Attendees will gain knowledge about their own specialties as well as an increased knowledge and appreciation of the work of others on the trauma team.

2019 FACULTY:

Roxie M. Albrecht, MD, FACS, FCCM

Welcome

From the Trauma Symposium Chairman

DEAR ATTENDEES:

Welcome to the 67th Annual Detroit Trauma Symposium, the largest continuously running symposium on trauma medicine in the United States.

First, look at the speakers this year. I hope you agree it's a great lineup. Second, consider the sunrise sessions. Your positive response to these opportunities made it a pleasure to schedule them again this year.

Thank you for coming. We are proud that the Detroit Trauma Symposium attracts not only distinguished trauma physicians but trauma nurses, surgery and emergency medicine residents, EMTs, allied health personnel, and medical students. The audience has continued to grow from the State of Michigan to nearly every state in the U.S. plus Canada. We invite you to take advantage of the networking opportunities throughout the Symposium to connect with colleagues and future colleagues from the great field of trauma medicine.

We always welcome your comments and suggestions. We have used them every year to be responsive to your interests. Hopefully, we have improved. Please keep us in mind when you have ideas for future symposia.

Sincerely,

Lawrence N. Diebel, MD
 Professor, Wayne State University School of Medicine
 Senior Trauma Surgeon, DMC Detroit Receiving Hospital
 Chairman, Detroit Trauma Symposium Operations Committee

CME Credit

The Wayne State University School of Medicine is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Wayne State University School of Medicine designates this live activity for a maximum of **17.75 AMA PRA Category 1 Credit(s)**[™]. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

- Thursday Sunrise Session A, B or C.....**1.0 credit**
- Thursday Program.....**8.50 credits**
 - Thursday AM Session I.....**4.00 credits**
 - Thursday Lunch Session.....**1.00 credits**
 - Thursday PM Session II.....**3.5 credits**
- Friday Sunrise Session D, E, or F.....**1.0 credit**
- Friday Program.....**7.25 credits**
 - Friday AM Session III.....**4.00 credits**
 - Friday Lunch Session.....**1.00 credit**
 - Friday PM Session IV.....**2.25 credits**
- **Total Credits.....17.75 (including Sunrise Sessions)**

This activity provides self-assessment credits toward the MOC.

ACEP Credit

Approved by the American College of Emergency Physicians for a maximum of **17.75** hours of ACEP Category 1 Credits.

CEU Credit

The Continuing Medical Education credits (CMEs) being offered at this symposium are applicable for RN/LPN license renewal in Michigan.

About Detroit Receiving Hospital and the Detroit Medical Center

Detroit Receiving Hospital is one of eight hospitals operated by the Detroit Medical Center (DMC). The 320-bed adult specialty hospital offers expertise in complex trauma, critical care, neuroscience and geriatrics. Detroit Receiving is Michigan's first Level I Trauma Center, offering the state's largest burn center, with a 24/7 hyperbaric oxygen therapy program. Its emergency department cares for more than 90,000 patients annually. In its affiliations with DMC and Wayne State University School of Medicine (WSU SOM), more than 95% of Detroit Receiving physicians serve on the faculty of the WSU SOM. As a teaching institution with a comprehensive medical residency program, almost 50% of emergency physicians practicing in Michigan received some of their training at Detroit Receiving Hospital.

About Wayne State University School of Medicine

Founded in 1868, the Wayne State University School of Medicine educates more than 1,000 medical students in all four classes. In addition to undergraduate medical education, the school offers master's degree, Ph.D. and M.D.-Ph.D. programs in 14 areas of basic science to about 400 students annually. The School of Medicine faculty graduates a diverse group of physicians and biomedical scientists who are transforming the promise of access to equal health into a reality for all. This is done in an urban setting and within a culture of inclusion, through high quality education, clinical excellence, pioneering research, local investment in our community and innovative technology, to prepare physician and biomedical scientific leaders to achieve health and wellness for our society.

Sessions

THURSDAY, NOVEMBER 7, 2019

Sunrise Session A 7:00-8:00 AM	Enter Sandman: Sedation in the Trauma Patient <i>Kay Golden PharmD, BCCCP</i>
Sunrise Session B 7:00-8:00 AM	Prehospital Use of Topical Hemostatic Agents <i>Joseph Gomez EMT-P, RN</i>
Sunrise Session C 7:00-8:00 AM	Part 1: Use of Limited Transthoracic Echocardiogram in Trauma and the ICU <i>John Gallien MD, RDMS (prior ultrasound experience recommended, must attend Part 1 & 2, limited to 30 registrants)</i>
Session I:	Moderator: <i>Lawrence Diebel MD, FACS</i>
8:00-8:30 AM	An Evidenced Based Guideline for Prehospital Resuscitation <i>Jason Sperry MD, MPH</i>
8:30-9:00 AM	Fly or Drive? Scene Transports and Transfers Using Helicopter EMS (HEMS) <i>Roxie M. Albrecht MD, FACS, FCCM</i>
9:00-9:30 AM	Role of CT Scan in Penetrating Trauma <i>Marc de Moya MD</i>
9:30-10:00 AM	Implementation of A Prehospital Blood and Blood Component Program for Traumatic Injury: What's the Evidence <i>Jason Sperry MD, MPH</i>
10:00-10:15 AM	Break
10:15-10:30 AM	Q & A
10:30-11:00 AM	Blunt Abdominal Wall & Associated Injuries <i>Roxie M. Albrecht MD, FACS, FCCM</i>
11:00-11:30 AM	Effective, Safe Pain Management in Trauma <i>Andrew Bernard MD, FACS</i>
11:30-12:00 PM	Rib Fracture Repairs: State of Affairs? <i>Marc de Moya MD</i>
12:00-12:15 PM	Q & A
12:15-1:15 PM	Luncheon Session: Implementation and Success of a Hospital-Based Injury Prevention Program <i>Tululope Sonuyi MD</i>

Session II	Moderator: <i>Michael White, MD</i>
1:15 - 1:45 PM	Management of Major Liver Injury <i>Andrew B. Peitzman MD</i>
1:45 - 2:15 PM	When Peer Review Becomes a Weapon— and How to Protect Yourself <i>Andrew Bernard MD, FACS</i>
2:15 - 2:45 PM	Crisis Leadership for Surgeons: Lessons from our Nation's Heroes <i>Alexander L. Eastman MD, MPH, FACS, FAEMS</i>
2:45 PM - 3:15 PM	Current Management of Pancreatic/ Duodenal Injuries <i>Martin A. Croce MD</i>
3:15 - 3:30 PM	Break
3:30 - 3:45 PM	Q & A
3:45 - 5:00 PM	Complex Trauma Cases <i>Anna Ledgerwood, MD</i>

FRIDAY, NOVEMBER 8, 2019

Sunrise Session D 7:00-8:00 AM	Recognition & Treatment of the Trauma Patient on Prescribed Oral Anti-Coagulants <i>Wazim Mohamed MD</i>
Sunrise Session E 7:00-8:00 AM	REBOA: Who/When/How? With Hands-On Simulation <i>Lawrence Diebel MD</i>
Sunrise Session F 7:00-8:00 AM	Part 2: Use of Limited Transthoracic Echocardiogram in Trauma and the ICU <i>John Gallien MD, RDMS</i> (Prior ultrasound experience recommended, must attend Part 1 & 2, limited to 30 registrants)
Session III	Moderator: <i>James G. Tyburski, MD, FACS</i>
8:00-8:45 AM	Panel - Residents from Michigan Training Hospitals
8:45 - 9:15 AM	STOP THE BLEED: A Community Effort <i>Andrew B. Peitzman MD</i>
9:15 - 9:45 AM	A Trauma Center Experience of Over Two Decades with Injuries due to GSW <i>Martin A. Croce MD</i>
9:45 - 10:15 AM	Gun Violence Policy - What Works <i>April Zeoli PhD</i>

10:15 - 10:30 AM	Q & A
10:30 - 10:45 AM	Break
10:45 - 11:15 AM	Panel on Gun Violence Control <i>Alexander L. Eastman MD, MPH, FACS, FAEMS</i>
11:15 - 11:45 AM	Domestic Partner Violence <i>April Zeoli PhD</i>
11:45 - 12:15 PM	Countering Weapons of Mass Destruction: The Newest DHS Component <i>Alexander L. Eastman MD, MPH, FACS, FAEMS</i>
12:15 - 1:15 PM	Luncheon Session: Extra-Terrestrial Medical Care <i>Scott Dulchavsky MD, PhD</i>
SESSION IV	Moderator: <i>Robert Welch MD</i>
1:15 - 1:45 PM	Management of Spine Injuries <i>Marc Moisi MD</i>
1:45 - 2:15 PM	Management of Femur Fractures in the Patients with Multiple Injuries <i>Rahul Vaidya MD</i>
2:15 - 2:45 PM	REBOA: Yes/No or Just Maybe? <i>Lawrence Diebel MD</i>
2:45 - 3:00 PM	Q&A
3:15 PM	Program Close and Raffle

Room Reservations

The MGM Grand Detroit is offering a special room rate of \$179 per night for 2019 Detroit Trauma Symposium attendees. To receive this rate, hotel reservations must be made by October 7, 2019. You must mention "Detroit Trauma Symposium" at the time the reservation is made in order to receive the special rate.

From the West /Detroit Metro Airport

Take I-94 East to M-10 South, exit left at Bagley Avenue.
 Turn left on Third Street.

From Detroit City Airport

From parking lot, turn right onto Connor and right again onto Gratiot. Follow I-94 West to M-10 South. Take M-10 South and exit left at Bagley Avenue.
 Turn left on Third Street.

From Ambassador Bridge

After crossing over the bridge, make a right on Fort Street.
 Take a left on Third Street.

From Detroit-Windsor Tunnel

After exiting the tunnel, turn right (east) onto Jefferson and then immediately loop around to go west on Jefferson. Turn right on Woodward.
 At traffic circle, veer left, then turn right on Michigan and right on Third Street.

From the North

Take I-75 South to the Grand River exit. From the service drive turn left on Third Street.

From the South

Take I-75 North to exit 50 toward Grand River Avenue.
 Turn right on Third Street.

From the East

Take I-94 West to M-10 South. Exit left at Bagley Avenue.
 Turn left on Third Street.

67th Annual Detroit Trauma Symposium Registration Form

November 7-8, 2019 | One person per registration form. Make copies as needed.

Name: _____
 Institution: _____
 Street Address: _____
 City: _____ State: _____ Zip: _____
 Daytime Telephone: _____ Fax: _____
 Email: _____

Registration Options

	Early Bird (through October 13)		Registration (after October 13)	
	Two-Day Attendance	One Day (check one) <input type="checkbox"/> Thursday <input type="checkbox"/> Friday	Two-Day Attendance	One Day (check one) <input type="checkbox"/> Thursday <input type="checkbox"/> Friday
Physician	<input type="checkbox"/> \$400	<input type="checkbox"/> \$250	<input type="checkbox"/> \$500	<input type="checkbox"/> \$350
Resident/Fellow	<input type="checkbox"/> \$250	<input type="checkbox"/> \$150	<input type="checkbox"/> \$300	<input type="checkbox"/> \$200
Allied Health (RN/LPN/PA/NP)	<input type="checkbox"/> \$150	<input type="checkbox"/> \$75	<input type="checkbox"/> \$150	<input type="checkbox"/> \$75
Registration complimentary for WSSS members in good-standing (subject to verification) <input type="checkbox"/>				

Sunrise Sessions (Optional, No Fee)

Sessions run simultaneously, register for only one course daily. Sign up early—sessions have limited seating.

Thursday & Friday, November 7-8:

(C) Intrathoracic Echo Part 1 (F) Intrathoracic Echo Part 2

Prerequisites: Ultrasound experience preferred. Must attend both sessions. Limited to 30 people.

Thursday, November 7:

(A) Sedation in the Trauma Patient (B) Prehospital Use of Topical Hemostatic Agents

Friday, November 8:

(D) Treatment of Oral Anti-coagulation (E) REBOA: (with hands-on simulation)

Lunch

Complimentary with registration (RSVP Required by October 25) Thursday Friday

Vegetarian Food Allergies (please describe): _____

Payment – Credit Card or Online

Secure registration is available online at www.DetroitTrauma.org or you may enter your payment information below and scan/email to cluiz@med.wayne.edu or fax to 313.577.5310

Card Number: _____ Amount to Charge: _____

Expiration Date (MM/YY): _____ Signature: _____

Payment – Check

Enclosed is a check for \$_____ made payable to: Detroit Trauma Symposium-WSU
 Please return registration form and payment to: Detroit Trauma Symposium Registration Surgery Department/6C-UHC | 4201 St. Antoine Blvd. | Detroit, MI 48201

Cancellation Policy

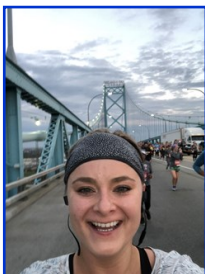

Cancellations received prior to October 10, 2019 will be eligible for a full refund. Cancellations received October 10–October 25, 2019 will be assessed a \$50 administrative fee. No refunds after October 25, 2019. Cancellations must be in writing to: cluiz@med.wayne.edu

GREETINGS FROM THE OUTFIELD

Stimulated by the excellent lecture on physician "burnout" provided by Dr. Jason Wilkinson from the Department of Psychiatry & Behavior Neurosciences at WSUSOM at the Resident Education Seminar in early October, a number of our residents and attending surgeons took the advice of Dr. Wilkinson by becoming involved in an exercise program culminating in the recent marathon race held in Detroit. There were a number of races including the Detroit Marathon, the Marathon Relay, and the Half-Marathon. The course for these races involved a number of streets in downtown Detroit near Greektown with some of the runners going across into Windsor, Ontario. Dr. Samantha Tarras (WSUGS 2011) and her husband, Mr. Mark Wisniewski, along with Dr. Larry Diebel (WSU/GS 1980/86) represented the faculty contingent, whereas Dr. Paige Aiello (PGY1), Dr. Rohan Policherla (PGY5), Dr. Anastasia Stevens-Chase (PGY5), and Dr. Jessica Pochedly (PGY5) represented the WSU surgery resident contingent.

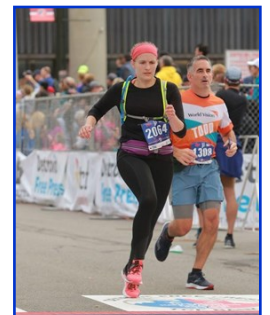

Dr. Anastasia Stevens-Chase completed the half-marathon, here she is crossing the bridge into Canada, which is mile 3 of the marathon

Dr. Larry Diebel right before he crosses the finish line

After the race (left to right), Dr. Samantha Tarras with her husband, Mark Wisniewski, Dr. Anastasia Stevens-Chase, Dr. Rohan Policherla, and Dr. Paige Aiello discuss their plans for next year's event!

Dr. Jessica Pochedly completed the full marathon and is shown here crossing the finish line

Wayne State Surgical Society

The Wayne State Surgical Society (WSSS) was established during the tenure of Dr. Alexander Walt as the Chairman of the Department of Surgery. WSSS was designed to create closer contact between the current faculty and residents with the former resident members in order to create a living family of all of the WSU Department of Surgery. The WSSS also supports department activities. Charter/Life Membership in the WSSS is attained by a donation of \$1,000 per year for ten years or \$10,000 prior to ten years. Annual membership is attained by a donation of \$200 per year. WSSS supports a visiting lecturer each fall and co-sponsors the annual reception of the department at the annual meeting of the American College of Surgeons. Dr. Brian Shapiro (WSU/GS 1988/93) passed the baton of presidency to Dr. Jeffrey Johnson (WSUGS 1984) at the WSSS Gathering during the American College of Surgeons meeting in October 2018. Members of the WSSS are listed on the next page. Dr. Johnson continues in the hope that all former residents will become lifetime members of the WSSS and participate in the annual sponsored lectureship and the annual reunion at the American College of Surgeons meeting.

*Operation-A-Year
January 1—December 31, 2019*

The WSU department of Surgery has instituted a new group of alumni who are remembering their training by donating the proceeds of one operation a year to the department. Those who join this new effort will be recognized herein as annual contributors. We hope that all of you will remember the department by donating one operation, regardless of difficulty or reimbursement, to the department to help train your replacements. Please send you donation to the Wayne State Surgical Society in care of Dr. Charles E. Lucas at Detroit Receiving Hospital, 4201 St. Antoine Street (Room 2V), Detroit, MI, 48201.

WSU SOM ENDOWMENT

The Wayne State University School of Medicine provides an opportunity for alumni to create endowments in support of their institution and also support the WSSS. For example, if Dr. John Smith wished to create the “Dr. John Smith Endowment Fund”, he could donate \$25,000 to the WSU SOM and those funds would be left untouched but, by their present, help with attracting other donations. The interest at the rate of 4% per year (\$1000) could be directed to the WSSS on an annual basis to help the WSSS continue its commitment to improving the education of surgical residents. Anyone who desires to have this type of named endowment established with the interest of that endowment supporting the WSSS should contact Ms. Lori Robitaille at the WSU SOM> She can be reached by email at lrobitai@med.wayne.edu.
