RE: *Nomination of A.P. Zingas, M.D., F.A.C.R. for 2023 Distinguished Alumni Award*

With pleasure, I nominate Dr. Alkis Zingas for the 2023 Distinguished Alumni Award.

I met Dr. Zingas as a medical student interested in radiology. As a resident, I had the opportunity to learn from Dr. Zingas, particularly in the area of Computed Tomography. Computed Tomography (CT) is a specific part of imaging that is Dr. Zingas' specialty. He has been involved in CT since it's inception in patient care in the early 1980s.

Over the last 50 years, Dr. Zingas has been a leader in radiologic education for Wayne State and the Detroit Medical Center. His dedication to the patient's we serve, our students and residents through teaching, the Wayne State School of Medicine and the people of Detroit is evident from his leadership positions and accomplishments. He has been a thought leader in imaging and a dedicated teacher of radiology. He is well published and has presented his thoughts to many students and other clinicians over the years. Other distinguished awards that have recognized his contribution to education and imaging.

Dr. Zingas continues to impact many patients, faculty, residents and students through his clinical work and apprentice teaching. He also continues to be engaged with the School of Medicine as a member of the Alumni Association, having served on the Board of Directors several times and as president of the Board in 2010-2011.

Dr. Zingas is a wonderful man, teacher, and physician. He is very deserving of the Wayne State School of Medicine Distinguished Alumni Award. It is an honor to nominate this local hero.

Sincerely,

A handwritten signature in cursive script that reads "Monte Harvill".

Monte Harvill, M.D., F.A.C.R.
Vice-Chief, Department of Radiology
Adult Central Campus- Detroit Medical Center
Director of Interventional Radiology Education
Detroit Medical Center/Wayne State University

To whom it may concern,

It is my honor and with great enthusiasm that I am afforded the opportunity to write to you this letter of support to acknowledge the wonderful accomplishments of Dr. Alkis Zingas; and to impress upon the Alumni Association that he is deserving and overdue to receive WSU SOM Distinguished Alumni Award. Dr. Zingas has been the foundation, a visionary and a revolutionary for the department of Radiology at the Detroit Medical Center and Wayne State University. He is someone that I am very proud to say has had a profound impact on how I care for my patients and community around me. It is something that he not only expresses, but lives daily and should be mirrored by every one of our past, present and future students and Alumni's. His devotion and sacrifice to the Medical School and the DMC has had an insurmountable impact on caring for the underserved communities that Wayne State and the DMC prides itself on serving.

Dr. Zingas earned his Undergraduate (1966) and Medical education (1970) from WSU which was followed by him completing his Internship (1971), residency (1974), and Fellowship (1975) of Diagnostic Radiology at Harper University Hospital. He would continue his dedication to serve the University by holding faculty appointments starting as Clinical Instructor (1975) and advancing to Clinical Professor of Radiology (present). During these appointments he would also serve as a Faculty advisor for 4th year medical students and help guide them to succeed in their future ambitions. While he tirelessly served WSU Medical School, he would simultaneously serve the DMC as an active medical staff member and hold many leadership roles throughout the hospital. He served as Secretary and Coordinator of Radiology Resident Education where he helped train and develop many of the Radiologists that serve southeast Michigan as well as throughout the USA. His hard work and dedication resulted in his promotion to becoming Vice-Chief of Radiology at Harper Hospital and then ultimately Chief of Radiology at Harper Hospital and Detroit Receiving Hospital. Throughout all of this, he would also actively participate in many committees involved in but not limited to the daily operations of the hospital, the Departments of Radiology, Emergency Medicine, Trauma Surgery, and Oncology.

Throughout Dr. Zingas career he relentlessly pursued improvement. His leadership would play a pivotal role in shaping Radiology throughout southeast Michigan. He always recognized the importance of caring for the underserved and tirelessly searched for ways to better deliver healthcare for those who were most in need. He is a strong advocate for the disproportionate members of our society. Here at the University and Medical Center he was the founder of the ultrasound and CT sections and promoted the modalities and their use for earlier disease detection and treatment as he campaigned to better serve our community.

Dr. Zingas has been a great Class Ambassador for 20-25 years not to mention an amazing Ambassador of medicine. He has held various teaching roles for decades and taught at all levels. He trained one of the first CT and US technologists in southeast Michigan as well as trained countless medical students, residents, and fellows. He has written many book chapters, case reports, exhibits, and presentations. He has been active in many committees, President of

the Michigan Radiological Society, active supporter and contributor to the WSU Alumni Association and the School of Medicine as a whole. He continues to be a valuable consultant and supporter of the community. It is only right and fitting and long overdue that the Alumni Association recognizes Dr. Zingas with the Distinguished Alumni Award. He has been a pioneer in Radiology to southeast Michigan and helped usher in many imaging modalities and technological advancements that are used every day to care for our patients and our community.

Sincerely,
